The Lost Pyramids of Bosnia

A Presentation by
Sam Osmanagich Ph.D.

Sam Osmanagich will present the work that has been undertaken in Bosnia since his amazing discovery of a complex of pyramids and pre-historical tunnels in a valley near Sarajevo in 2005. Bosnian Pyramid of the Sun with

its geometrical shape - the four triangular slopes that point toward the cardinal points, best quality concrete blocks on its surface and electromagnetic and ultrasound beams coming through the top, has become worldwide attraction. Sam will give us a picture of this work and the latest exciting discoveries.

Dr. Sam Osmanagich, is an anthropology professor at the American University in Bosnia-Herzegovina. He holds Ph.D. in Mayan studies and has been

admitted as a Foreign Member of distinguished Russian Academy of Natural Sciences. He has discovered ancient pyramidal complex in Visoko, Bosnia-Herzegovina which consists of five colossal stone structures in the shape of the pyramid with extensive pre-historical underground tunnel network. He's Principal Investigator of the inter-disciplinary scientific Bosnian Pyramid project which has grown to the most active archaeological site in the world which attracts hundreds of volunteers, dozens of experts and tens of thousands of tourists every year in Bosnia. He has become world renowned expert on pyramids by investigating these structures in China, Mauritius, Canary Islands, Egypt, Peru, El Salvador, Guatemala, Bolivia, Honduras, USA, Mexico and other countries. He's authored 15 books on ancient civilisations and pyramid phenomena all over the Planet.
