

Is our Time calculation of Before and After a Zero of prehistoric origin?

By Robert Madsen

TIME will start at different times.

For the Christians, everything started in the Year Zero with a Savior's birth. But is it a Christian invention thus assumed that our year-marker, Year Zero, shows for the first time with this?

Or was it already established, and was a Before and After-pole in an ancient Calender's system?

This suggests it when you scrutinize Pyramid culture's own sources. Here in Sumerian, Egyptian and Mayan mythical sources. There you can find the Time marker.

Well let's start with the Maya.

The Mayan Long Count calender identifies a day by counting the number of days passed since a Mythical Creation date that corosponds to August 11, 3114 BC in the proleptic gregorian Calender.

The completion of 13 Baktuns (august 11, 3114 BC) marks the creation of the world of human beings according to the Maya.

On this day, Raised-Up-Sky-Lord caused three stones to be set by associated gods at Lying-Down-Sky and First-Three-Stone-Set.

Because the Sky still lay on the primordial sea, it was black. The setting of the three stones centered the cosmos which allowed the sky to be raised, revealing the Sun.

Mythic yes. But important is the year 3114 in the light of Before a zero. Why? Because the figure can be found in Egyptian and Sumerian oldest sources. We shall see that this Time calculation existed before it was Christianized!

Also. Let's start with the Coffin Texts and the Egyptian Book of Hours. The number 3114 appears in the coffin texts, but is Stored In A CODE SYSTEM.

Other main figures should also be known in order to find this year. Here, it is primarily the Number 31, as mentioned in the book of hours. In verse 32. "The THIRTY-ONE who offer to the...who are Pre-eminent in..." The texts is a little fragmentary but the Figure is the Main Ingredient to find 3114 in the coffin texts!

As one would even perpetrate an act by reading the coffin text, for then so calculating on a mysterious coded description, THIS is the very meaning of the text!
In spell 1143, it is reported

" SEPERATE THE TWO COMBATANTS IN 603 STORMS.
THERE ARE 600 IN THE BREADTH OF WHAT IS OVER THIS LAKE !!!

O YOU WHOSE FACE IS HIDDEN.
HORUS THE ELDER IS IN THE MIDDLE OF THE UPPER STARS AND OPPOSITE

THE LOWER ONES "

Yes, that describes it. So I will try to unravel the logic!

First - We point out that the Width of the Lake is described is 600 (units).

That this "lake" is in the middle of the upper stars!

And this corresponds to being KHAFRE'S PYRAMID which is actually the Middle of the three Giza pyramids.

Second – Now is the WIDTH of the PYRAMID as you must know.

This pyramid bottom width was 411 cubits then.

This means that we are now using these Code numbers which are the numbers 600, 603, 411 (bottom width) and 31 from the first book. And which are numbers that you can calculate with.

What I mean is that Zero Year stake is actually stored in the code numbers here!

This means that you can count on the Year 41100 before zero.

The number 411 thus becomes one hundred-some more. It must be calculated with and transfer to Year Count so we can de-crypt it.

The implication here is that we are in the Year 41100 BC.

There are 600 in the breadth of what is about this....the sense that there was elapsed 600 years and we are now in the Year 40500 before zero where the primary count begins.

The actual text of the mystique is described that there are Two Combatants present.

These Two should be Separated in 603 Storms!

With a starting point as in 40500 BC. Is the secret the two combatants as described to be Twice the sum Thirty-one and what is Sixty-two.

It is now that we can calculate for we have all these code numbers overall. We calculate with 62-year Rounds therefore.

These 62-year rounds Must be multiplied by 603 which is Storm-figure !!!

Here are 62×603 also sum 37386, and these are the years that had elapsed since 40500 before zero.

The code Are we count down towards Zero pointer.

Calculated is 37,386 years had passed since then. Where are the go?

The answer is.

- It Shows THE YEAR 3114 Before Zero !!!
- The Same Year that the Mayan Calender begins!

Well, figure 3114 is here. Is it Random? Code numbers speak for themselves.

Of the 411 of the Pyramid width and the remaining numbers combined we reach the ZERO YEAR Marker. Figuring method is beyond doubt.

The numbers here SPANS 600 YEARS from 41100 BC to 40500 BC.

They Span A Round of 603 rounds of 62-years, and Land in 3114 before zero!
Is it Random? Hardly.
They literally calculated Years Down!

As the Numbers are and it is multiplied and added. So it seems that the Egyptians and Mayans (each garden different calender systems) would have had 3114 Year in common.

And,
This tells the numeric code; the Egyptians COUNT BACKWARDS. Count down to a zero year.

Not Unjust is the description, "middle of the upper stars". As measured by the foot of the Khafre pyramid. There was a count intent in and with the pyramid measuring unit.

CHAPTER II

Well, let`s change the subject.

Let us look at the Sumerian King List. There are counting whimsy in the report offered; the Great Years of cycles in the past. Kings prevailing before and after The Great Flood.

There follows a translation of the Cuneiform board. The List must be seen in the light of numerical coding. Not to be taken literally. It is specious Years coding rather. All begins with the very origin of kingship.

Translation

"After the Kingship descended from heaven, the kingship was in Eridug.
In Eridug, Alulim became king: He ruled for 28800 years.
Alaljar ruled for 36000 years.
2 kings; they ruled for 64800 years.
Then Eridug fell and the Kingship was taken to Bad-tibira.

In Bad-tibira, En-men-lu-ana ruled for 43200 years. En-men-gal-ana ruled for 28800 years.
Dumuzid, the shepherd, ruled for 36000 years.
3 kings; they ruled for 108000 years.
Then Bad-tibira fell and the Kingship was taken to Larag.

In Larag, En-sipad-zid-ana ruled for 28800 years.
1 king; he ruled for 28800 years.
Then Larag fell and the Kingship was taken to Zimbir.

In Zimbir, En-men-dur-ana became king: he ruled for 21000 years.
1 king; he ruled for 21000 years.
Then Zimbir fell and the Kingship was taken to Curuppag.

In Curuppag, Ubara-tutu became king: he ruled for 18600 years.
1 king; he ruled for 18600 years.
In 5 cities, 8 kings: They ruled for 241200 Years. Then the Flood swept over."

Disregard the kings incredible longevity. This is rather a numeric code subtly Constructed.

It is about the years leading up to the world famous Great Flood.

This was A Special Year where the Proposed Boundary.
No one knows When this was. But this Year is stored in the Code set.

We can find numbers such as 40500 and 3114 bluntly!

You ask How?

By dividing the big Year-round numbers.

List has: They ruled for 64800 years. One hundredth thereof are - 648
Ruled for 108000 years. A thousandth thereof are – 108
Ruled for 28800 years. One hundredth thereof are – 288
Ruled for 21000 years. One hundredth thereof are – 210
And ruled for 18600 years. Where One-tenth thereof are – 1860

Now plus the numbers. $648 + 108 + 288 + 210 + 1860$. The figures add up to 3114 !!!
I guess this numerical method is to know when the "Flood Year" was.

Next: In a First remote Age (with two kings) were rounded 64800 years.
The figure is 1,6 units of 40500 (comes to BC)

The following: In the Last round before The flood. 18600 years.
Which is 600 times the number 31

And. The Whole Timeline Before the Flood. 241200 years.
Is 400 times the number 603, the Storm figure.

Is this coincidence? The very same numbers as the Egyptian code! One can hardly believe it.

As the figures give (introduced here the Sumerian) So it seems that They used the Zero Year marker. They did count backwards. All of which suggests that there was set a milestone at the time in 3114 BC.

Look at it. Three different pyramid cultures agreed to Boundary set in 3114! Is it not that the figures here show it?

That the Zero Year selection was invented Before the zero.

Conclusion. Our Western Time calculation when here according to the oldest written sources Begins in 40500 before Time (or 600 years before).

The old pyramid builders put a Beginning There.
