

The shattered wall, the broken tower have a story to tell; from the touchstones of ruins and ancient texts we make a pilgrimage
— Michael Alexander

White Memorial

Maoling, popularly known as the Great White Pyramid, is the tomb of Emperor Wu of Han (156-87 BCE) located in Xingping, Shaanxi Province in China. It is a trapezoidal tumulus built from rammed earth with a height of 47 metres. Construction of the tomb began in 139 BCE, the second year in the reign of Emperor Wu and took 53 years until completion upon the emperor's death. Maoling is the largest in a group of more than 20 tombs in the area.

Unusual Temple

Gobekli Tepe is a 12,000-year-old site, about 15 km away from the city of Sanliurfa, in southern Turkey. Excavations have revealed that there are at least 20 such installations or temples. There are two huge monumental pillars in the centre of each installation, surrounded by enclosures and walls. There are carvings of animals and symbols on these pillars. The weight of each pillar is around 60 tonnes, leaving everyone puzzled as to how on earth the stones were mounted.

The Bosnian Pyramids

Bosnian archaeologist SAM OSMANAGICH who claims to have discovered the world's oldest pyramids in the Balkans, says this project will not only change history, but also has the potential to change our future for the better

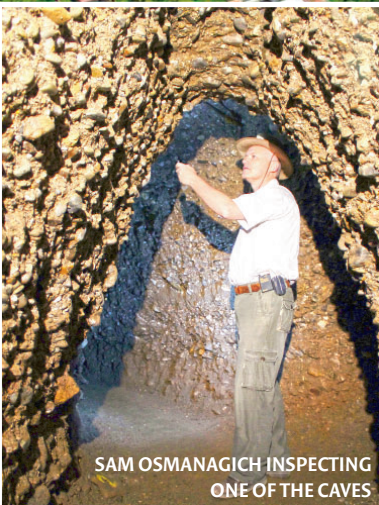

In April 2005, when I first travelled to the town of Visoko near Sarajevo, the capital of Bosnia-Herzegovina, my attention was caught by two regularly shaped hills, which I later named the Bosnian Pyramids of the Sun and Moon. For thousands of years, locals have considered those hills to be natural phenomenon as they were covered by one meter of soil and vegetation. However, when I first saw their triangular faces, obvious corners and orientation toward the cardinal points (East-West, North-South), I knew that they had to be constructed by intelligent hands. Since I had been studying pyramids for decades, I knew that the pyramids found in China, Mexico, Guatemala and Honduras were also covered by dirt and vegetation.

Treasure Trove

Shortly thereafter, I set up the non-profit Archaeological Park-Bosnian Pyramid of the Sun Foundation, and since then, the pyramid investigations in Bosnia have become the world's largest interdisciplinary scientific project in the area of archaeology. We have spent a lot of time and resources in archaeological excavation, sample testing and radiocarbon dating. We've determined that the Bosnian valley of pyramids consists of five structures, which I call the Bosnian Pyramids of the Sun, Moon, Dragon, Mother Earth and Love. The site also includes a tumulus complex and a huge underground labyrinth. Beneath the pyramids, there is a 10-mile long extensive network of tunnels and chambers. Huge ceramic sculptures have been discovered in the underground labyrinth with a mass of several tonnes, which make them the largest found so far in the ancient world. Under every original old pyramid — like the Shaanxi in China, Giza and Saqqara in Egypt, Teotihuacan and Palenque in Mexico — underground tunnels were built as a part of construction. Several scientific conferences on the Bosnian pyramids held in 2008, 2011, 2012, 2013 and 2014 have concluded that the tunnel complex is a pre-his-

torical ingenious construction where electromagnetic fields with high concentration of negative ions have been present. When we started the project in 2006, almost the entire cultural establishment of Bosnia was against us. They would never come to the archaeological site, but they asked the government to stop the digging. When the government rejected their petition, they asked the European Archaeological Association, and leading archaeologists from France, Germany, Great Britain, USA and Egypt to stop the project. They haven't succeeded and we're still digging, testing and dating. We have also opened our own museum at the site and have attracted a stream of volunteers, visitors and mediapersons. It

shows that if you go for the noble goal and use scientific ways, you can make it, despite all obstacles. Discoveries of remnants of ancient civilisations — including the Mayan temples in central America, the 12,000-year-old Yonaguni monuments on the bottom of the Pacific floor and the over 9,000-year-old Gobekli Tepe

megalithic circles in southeastern Turkey — have changed our views about the ancients. Obviously, we are not the first, most intelligent and most developed people on earth. Four independent teams of energy experts from Croatia, Serbia, Italy and Finland have confirmed the existence of an electromagnetic field — radius of 4.5 metres, frequency of 28 kHz and strength of 3.9 — coming from the centre of the very top of the Bosnian Pyramid of the Sun. Results have shown that the strength of the signal at the top is 50 times stronger. It means that the pyramids act as huge energy amplifiers. These frequencies are not found randomly in nature. It seems that the pyramid-builders created a perpetual motion machine and this 'energy machine' is still working. Outside the pyramid complex, plan-

etary resonance is much higher and unhealthy. Bio-energy fields above the Bosnian Pyramid of the Sun show that the pyramid is still actively sending energy beams to the ionosphere, unlike the still horizontal fields above the town of Visoko. So, this project not only changes the history, but has a potential to change our future for the better. The most significant discovery in the last 10 years has been the true purpose of the Bosnian pyramids. They are not built as royal tombs or places for rituals. The pyramid complex is built as an energy device for rejuvenation, regeneration, and improvement of the air, water and food molecular structure. Also, through the energy beam, ultrasound and other forms of energy can be moved on an interplanetary level. Probably, the pyramid was used as a very powerful communication device.

Our project is not just another local archaeological discovery. We hope to change global consciousness. We will help people understand the need for harmony between us and nature, develop spiritual senses, stay open for different views of the past and learn from a more developed view of the past. In the coming months, I expect to find bigger chambers, maybe open spaces, underground lakes with healing water, elements of sacred geometry and much stronger energy fields. Pyramid energy improves the molecular structure of objects and beings. The discovery of the Bosnian pyramids have affected my life tremendously. Every one of us has his own destiny. It seems to me that I've been prepared for a few decades for this discov-

IT SEEMS THAT THE BUILDERS OF THE PYRAMID CREATED A PERPETUAL MOTION MACHINE AND THIS 'ENERGY MACHINE' IS STILL WORKING. OUTSIDE THE PYRAMID COMPLEX, PLANETARY RESONANCE IS HIGHER AND UNHEALTHY

ery. It's as if an invisible hand has been guiding me on my life's path, taking me to the Mayan pyramids in the central American cities of Guatemala, Honduras, El Salvador, Mexico, then to the pyramids in China, Egypt, Indonesia, Mauritius, Canary Islands, the US, Bolivia, Spain and other places. The discovery happened when I was ready. In the last 11 years, I've been the most blessed person in the world. I have met with thousands of people every year: distinguished scientists, independent researchers, spiritual leaders, channelers, guests and tourists. I've learnt so much from them. I've realised that we're complex beings, consisting of a physical body, soul and spirit. We need to have our physical and spiritual dimension in balance, and then we need to live in harmony with nature. ■ Post your comments at speakingtree.in

A Man Worthy Of Trust

The king's messenger ran to the prison to fetch Yusuf, expecting the prisoner to be overjoyed at the summons from the king. To his amazement, Yusuf refused to leave the prison until his name had been cleared. After all, Yusuf was to carry out the prophetic mission of Allah. For this important duty, it was necessary that any false charges should be cleared

and he should emerge with a clean image. The king ordered an enquiry into Yusuf's complaint and found that all the charges against him were false. The Aziz's wife and other women were called. "We know no evil of him," the Aziz's wife admitted. "Now the truth must come to light," she said, "it was I who attempted to seduce him. He has told the truth." When Yusuf learnt about the con-

fession of the Aziz's wife, he thanked Allah from the depth of his heart. "Now my former master (the Aziz) will know that I did not betray him behind his back, and that Allah does not guide those who betray their trust," he exclaimed. Yusuf was honourably released from the prison. But he did not claim this victory as his own. "I am not trying to absolve myself," he said, "for man's inner self does incite him to evil, and only those are saved upon whom my Lord bestows His mercy. My Lord is forgiving and merciful." When Yusuf appeared before the king, the latter was very impressed by his extraordinary personality, especially his wisdom and truthfulness. "From now on you shall dwell with us, honoured and trusted," said the King. "Give me charge of the granaries of the realm. I shall be a good and intelligent keeper," replied Yusuf. The king happily made him the minister of granaries and charged

him with making sure that there would be enough grain to meet all requirements during the famine that was to come. 'Thus We Established Yusuf' The Prophet Yusuf was about 30 years old when he was appointed by the king of Egypt as his trusted minister to look after the granaries. Allah had established Yusuf securely in the land of Egypt. Sometimes it is the hardships in life that lead the way to goodness. In the case of the Prophet Yusuf, when he was thrown into the dark well, it was apparently a great hardship for him. But the world is managed and governed by Allah alone, and He makes special plans for His servants. So the well became the first step for Yusuf to reach great heights, taken as he was from a small village to the most modern city of that time in Egypt and ultimately finding an honourable position in the house of a

noble prince there. Likewise the dark prison became a stepping-stone to the royal court and ultimately to the seat of power in the land of Egypt. Misfortune and failure in life are common occurrences, but coupled with a positive attitude, they can be turned into future success. By contrast, failure coupled with a negative attitude can only lead to more failure. There is no end to the possibilities for success in life for the indi-

vidual who can take a lesson from failure. But life's trials must be faced with patience, perseverance and compassion. The story of the Prophet Yusuf is a great reminder to believers to put their entire trust in Allah and pray to Him in good times, as well as in adversity. As the Quran puts it: "With every hardship comes ease" (94:5-6). ■ — Tell Me About Prophet Yusuf, Goodword Books
