

Talk by Nigel Grace on the Discovery of the Bosnian Pyramids and the Mystery of “Energy” Pyramids around the world.

Seventy people packed the main hall of East Court, the 18th Century building which houses the city administration of East Grinstead in Sussex, England, to hear about break-throughs in understanding of why pyramids were built all over the world in distant ages past.

Nigel Grace, technology professional, TM teacher and researcher, had been invited to speak by the **Indigo Umbrella** meeting group, and Nigel was joined by Sally Griffiths, also an experienced volunteer at the Bosnian Pyramid Summer Volunteer Camps.

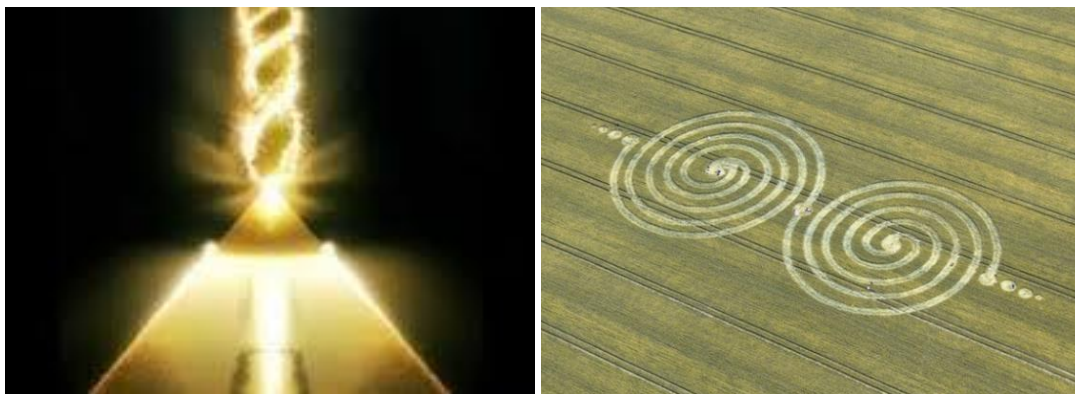

The audience ranged from people who had only heard of the Giza Pyramids to world travellers who had their own experiences of visiting the Mexican, Mayan and Egyptian Pyramids.

During the two-hour presentation, Nigel described claims made by scientists, researchers and archaeologists that pyramids were never intended as burial places for rulers or Pharaohs. Quoting the Egyptian wisdom keeper, Abd'el Hakim Awyan, the indigenous words for the Great Pyramid are **PR.NTR**; Per meaning Nature and Neter, for House of Energy. Thereby we arrive at a definition of the Great “Per-Neter” to generate, transform, and transmit energy. Nigel gave examples of pyramids from Mexico to China including Cambodia, Guatamala, Mexico and even the USA, all displaying

similar design features, geometry and vicinity to water and underground energy currents, but many of these pyramids are concealed by forest growth or deliberately by government authorities.

Thanks to Dr Sam Osmanagich's discovery of the Bosnian Pyramid of the Sun, we now have an interdisciplinary research project to discover and uncover ancient technologies of energy generation that may well be the legacy of ancient pyramid builders. Nigel described how ten years ago, Sam quickly realised that the geometric shapes of large structures in Bosnia could not be natural hill formations. Sam renamed the Hill of Visoko to the Bosnian Pyramid of the Sun due to its similarities to the Mayan Pyramid. This ancient structure in Bosnia exceeds in height and mass all the other principal pyramids in the world. It has perfect triangular faces on at least three sides, and its orientation to the Cosmic North is even more accurate than the Great Pyramid in Giza.

Summarizing six years of archaeo-acoustic research by independent research teams, Nigel described the scientific identification of a 28-kHz electro-magnetic signal emerging from the top of the Bosnian Pyramid of the Sun, that is created by the pyramid itself, and strong emissions of low frequencies of 5 – 50 hertz, near to the Schuman Resonance 7.83 Infra sound, which corresponds to *alpha brainwave* patterns associated with relaxation and healing. This research has recently culminated in the identification of scalar waves within the pyramid beam which have remarkable properties including superluminal travel, the ability to transmit and magnify power, and communicate with other energy generating structures via resonance.

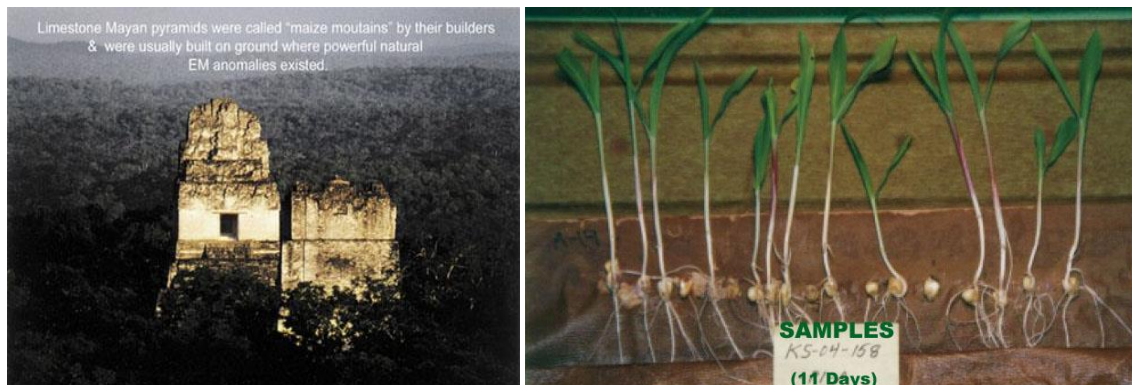

This may be the greatest discovery to date of the Bosnian Pyramids and gives credence to the theory of a global resonating network of pyramids and sacred sites.

Nigel said that ancient cultures inhabiting the Bosnian valleys have left behind megaliths and stone carvings that may point to a people who understood scalar waves and energy technology as illustrated on an obelisk in the forests of Olovo (pictured here with Sally). Nigel also showed images of crops circles with patterns emulating scalar waves.

But why did the ancient Pyramid Builders want to create energy? Nigel shared with the audience the work of John Burke and Kaj Halberg from their book: "Seed of Knowledge, Stone of Plenty" in which the authors demonstrated that pyramids transform and amplify naturally occurring Earth energy for the germination of seeds, and that this was the cause of the world-wide distribution of pyramids. The authors not only cite that the Limestone Mayan pyramids were called "Maize Mountains" by

their builders, but the authors were also able to replicate dramatic improvements in seed growth after being placed on-top of the Lost World Pyramid in Tikal during a surge in electrical charge produced by the pyramid.

Nigel emphasized that all energy-generating pyramids have a local source of water, either by their proximity to a river or underground, that is then used by the pyramid to convert the electrical power of water to the electro-magnetic force. The audience were also greatly fascinated by the strength of the concrete found on the Bosnian Pyramid and how this ancient concrete could insulate the energies inside the pyramid from seeping out.

In the second half of Nigel's talk, he shared the exciting find of secret tunnels underneath the ancient Mexican Pyramid of the Moon in Teotihuacan as reported by British media including the Daily Mail newspaper, but he lamented that archaeologists quickly label such findings to support the modern paradyme that these ancient engineering feats, including the hydraulic system found under the Temple, only point to religious and superstitious beliefs of our ancestors.

Nigel's slides included his own experience excavating Ravne Tunnel complex in the Bosnian Valley of the Pyramids, including the new discoveries of *orgone* energy, that is thought to be able to restore balance to living systems, as well as heightened negative ions and ultra-and infra sound waves – all pointing to a powerful healing and energetic place. The audience were also astounded by videos and photos of light-orbs and images of electrified light sweeping through the tunnels.

One gentleman in the audience asked if pyramids are connected through their orientation and construction to star constellations. Quickly rummaging through his slides, Nigel showed examples of how researchers and authors collectively conclude how the Pyramids at Giza point to the Constellation of Orion, as do also the Xi'an Pyramids in China and the Teotihuacan Pyramids in Mexico.

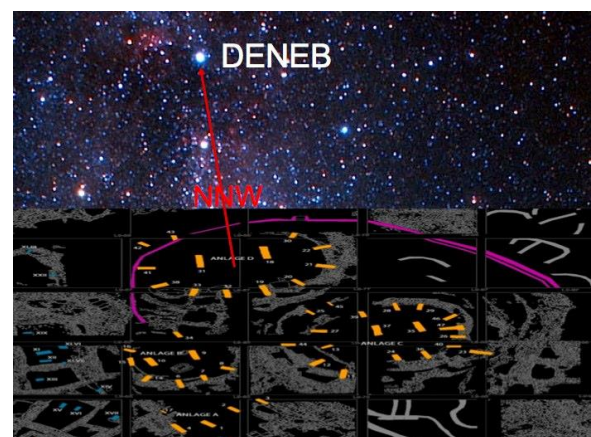

Visitors to the Bosnian Pyramid complex such as James Tyberonn, said that the primary stellar alignments of the Bosnian pyramids are to Alpha Reticula and Sirius. But Nigel told the audience that his greatest interest lies in the work of some independent researchers of astral alignment who studied the whole geophysical layout the Valley of the Bosnian Pyramids including a tumulus (artificial mound) on the hill of Ginje. This tumulus aligns with the Bosnian Pyramid of the Sun when the Pyramid itself intersects precisely with its sister pyramids of the Moon and Dragon ultimately aligning to the star Deneb in the constellation of Cygnus.

Remarkably, excavations at Gobekli Tepe, billed as the Oldest Temple in the world at the 11,500-year-old proto-Neolithic site close to Sanliurfa in Turkey displays a similar orientation to Deneb.

The audience was eager to consider whether the ancient pyramid builders came from a distant star system, or even whether the orientation and alignments shared by many pyramids speak to a future destiny of mankind, and of ascension to the stars. But perhaps the most important lesson to learn from the ancient and mysterious global culture of pyramid building is the clear and undeniable presence of technology that is life-supporting to human beings in every way.

At this time of global pollution and compromise to our planetary living systems by fossil fuelled technology, surely our emerging understanding of pyramid energy brings with it a wakeup call for humanity?

Nigel concluded his talk by remembering the words of Dr JJ Hurtak, the author of the Keys of Enoch, when JJ visited the Bosnian Pyramid and Ravne tunnels.

"The symbolism of a Pyramid is one of a great unification of consciousness. The timely discovery in 2006 of this ancient Valley of Pyramids, coupled with its perpetual energy technology, rejuvenation and healing powers, may herald the readiness of the human species to advance into a higher form of unity conscious which embraces Divine Light and Spirit"

Such a perspective inspires us to keep supporting the Bosnian Pyramid project guided by Sam Osmanagich, and to welcome people who get the call to come and volunteer.

After the talk, several people came up to Nigel and wanted more information how to volunteer and to join the ongoing adventure! To all these people we give a big welcome or as we say in Bosnia – **"Dobrodosli!"**
